

Carr Head Primary School - Knowledge Organiser

Geography Topic:

Seasonal Weather

Year One

Spring 2

Key Knowledge

Human and Physical Geography	The year is split into four seasons: spring, summer, autumn and winter.	
	autumn	In autumn , the weather begins to get colder. The leaves start to fall off the trees. The amount of daylight becomes less. This means the days are shorter and the nights are longer.
	winter	In winter , the weather is much colder. Sometimes it is cold enough to freeze
	spring	In spring , the weather starts to get warmer. The leaves start to grow on the trees and some trees blossom (have flowers). Plants begin to grow and you may see baby animals like lambs around. The daytimes start to get longer.
	Summer	In summer , the weather gets hotter. The daytime is long and nights are short. Summer has the longest days. The trees are full of leaves and there are lots of flowers, bees, butterflies and other insects.
	weather	The weather includes the temperature outside, the wind direction and strength, as well as rain, cloud or snow.
